Summary The reddest of our diamonds.

Description

A real innovation! This new variety by Jean RENAULT is spectacular for its abundant and long lasting flowers, the reddest of *Hydrangea paniculata*! From early July, this shrub is covered in large flowerheads (up to 30 - 40 cm). Its strong stems bear abundant sterile flowers with large sepals. The lush panicle blooms first of all white then the "diamond" turns pink, becoming deeper in colour then quickly, from August onwards, bursts into raspberry red, then turns wine red for a few weeks, until the...

Technical sheet
