Product Image

Summary Shiny red berries contrast well with the beautiful dark green foliage.

Description

Like all varieties of Hypericum of the **MAGICAL®** range, this variety presents:- a quality, semi-evergreen, rather dark green, especially rust resistant foliage,- rather dense and well-branched growth,- an abundance of small yellow flowers with big stamens, from May-June onwards, - generous forming of fruits from June-July onwards,- excellent and very quick second flowering,- new groups of fruits adding a decorative interest to the shrub until at least the end of September. The shiny red berries o...
